Subject: Transmittal of Cultural Resources Survey, United Minerals, Dog Valley Mineral Mine, S/015/0101, Emery County, Utah

Dear Ms. Hunsaker:

Enclosed with this letter is a copy of the report from USU Archaeological Services for the referenced mine. I apologize for not including it with my March 30, 2011, letter. A map of the proposed disturbance was sent to you previously.

United Minerals has proposed conducting small mining operations in Section 31, Township 23 South, Range 6 East, Emery County, Utah. A cultural resource survey was conducted by USU Archaeological Services, Inc. Two sites were found within the area proposed to be disturbed, 42EM662 and 42EM4350. The report states: "Based upon the intensive and reconnaissance level survey and the lack of significant cultural resources USUAS recommends that no further work is necessary for this area. United Minerals' operations will not adversely impact significant cultural resources in the area."

Accordingly, the Division of Oil, Gas and Mining has determined that there will be **No Adverse Effects** to significant cultural resources, and we seek your concurrence with this determination.

Thank you for your assistance. Please call me at 801-538-5261 if you have questions about this request.

Sincerely,

Paul B. Baker
Minerals Program Manager
